terday, started off boldly this morning and in a short time had more than recovered the loss sustained. Emphatic and well supported strength were the features of the situation throughout the day, and in the case of wheat sensational gains were to be noted. The weather and crop conditions and the strength displayed elsewhere were the leading factors, and their effects were the leading factors, and their effects were the leading factors, and their effects were far reaching. At this point the upward movement was renewed with great vigor, all the speculative markets falling into line and throughout the day exhibited unmistakable strength and buillishness. In fact nothing like to-day's experience has been witnessed since the present buill market was inaugurated, the buil fever raging without interruption all day and the closing prices for the different grains being right up a leading at the top. As was to have been expected, speculation was liveller, there being periods when trading fell off a little but as a whole the scene in the local pit was one of activity and excitement, each budge in price bing received with yells of satisfaction, causing received with yells of satisfact

There have been bull markets and sharp bulges of various magnitude since the present upturn in wheat was inaugurated some time ago, but none to equal that of today's sensational advance. Liquidation started yesterday having run its course, the bull side of the situation again became uppermost, the setback of yesterday being recovered from without difficulty and the upward movement in prices renewed with so much vigor and vim that some very sensutional advances were made and before the close of the day the best prices on the crop went on record. There seemed to be no checking the advance after it once fairly got under was, everything of a bearish cast being reached, but rices going over le higher, and the market closed right at the top and from 14c to 13c higher for the day. The early conditions this morning were such est to bring about a complete change of front in the speculative situation and wipe out such evidences of weakness as may have remaided over from yesterday, and turn traders to the buying side. Most prominent among there considerations was the aveilty Goyernment report on spring whee; and which indicated undoubted damage to the ulges of various magnitude since the pres-

among these considerations was the excelly Government report on spring wheel, and which indicated undoubted damage to the crop in various sections, with some fickle plowed up. Advices from many points in the Northwest reported nothing but light showers, which were confirmed by the weather map on change. English cables were largely better and indicated that the markets on the other side had commenced to realize that there was some foundation for our recent advances, and were confirmed to realize that there was some foundation for our recent advances, and were confirmed. to realize that there was some foundation for our recent advances, and were consened to be alarmed at the conditions prevailing in this country. Their response at first, however, was small. Liverpool and London being firm at \$\frac{1}{2}\$ advance over night. There were other influences, among them being the light receipts at Minnespolis and Duluth and the well-defined strength shown at those markets. On the other hand the weather was said to be all that could be desired for harvesting winter wheat, and a car of new wheat from Southwest Missouri was received here, but these builtshiftens cut no fee and had no important bearing upon prices.

items cut no fee and had no important bear ing upon prices.

The opening here was sensational and fairly took the breath away and creates wild excitement in the pit. The first shake out of the box was an awance of the like for July, which soid right at the opening a local, that option rising without opposition to local, from which there was a drop to local, which proved the low point of the day sept. did not bulge so much as the above there being more sellers than buyers but it

See, that option isling with nerv was a drop by the property of the control opposite the being more sclers than buyer, but it for the being more sclers than buyer, but it for the being more sclers than buyer, but it for the being more sclers than buyer, but it for the being more sclers than buyer, but it for the being more sclers than buyer, but it for the being more sclers than buyer, but it for the being more sclers than buyer, but it for the being more sclers than buyer, but it for the being more sclers than buyer but it for the being more sclers than buyer but it for the being more sclers than buyer but it for the screen was a sense that the schemal sample it for the screen was a general rush but in flow or and wheat. These unfavorable shadowed it is stand, and there was a general rush built to stand, and there was

Flaxseed.
Flaxseed recovered to day what it lost vesterday. Sept. sold only at \$1.37. Oct. opened at \$1.39\forall_5, declined to \$1.30, then reacted to \$1.31. Cash was nominal at \$1.30. Shipments were 756 bu. No receipts.

Timothy and Clover Seeds.

Timothy and Clover Seeds.

Timothy seed advanced 9c as a result of good buying by the country. Sept. \$2.30 to \$2.90. A big business was done—7 cars selling at \$2.90. 3 at \$2.55 and 2 at \$2.90. Oct. sold at \$2.80. Clover was firm, with contract quoted at \$8.

Provisions

Provisions

Provision speculators were caim in the minst of the excitement in grain, but were in accord with the general improving tendency of prices. Pork gained 74c and lard and ribs is each as the net result of the day's business. Local hog receipts numbered 34,000 head, with 35,000 estimated for to-morrow. The total received at the principal Western packing places was 90,331 compared with \$4,000 head the like day of the year before. Liverpool quotations for American hams were reduced \$d\$ and for lard 3d.

New York, June 2a.—It was a day of surprises on the Cotton Ex hange. From an indifferent start at about has nightly prices pendulations gathered remarkable impetus in the late session and swing fully 3 points. Moreover, speculation, which was exceptionally tume and featureless on the call, grew at an annua me rate. With total transactions probably tume and featureless on the call, grew at an annua for rate. With total transactions probably the last two hours of the resion. The official rating of the opening was quiet, with prices unchanged to 2 points higher toward the close of the first hour firm, cables from laterpool and bad crop advices from nearly every portfun of the belt started local covering, which gradually broadened until the ruth and Europe were also making conditions. With no special excitement noticed up to that time, however. Nor did the merket show violent change until after I o'clock, and speculation continued within reasonable between the prices for continued wet weather it remplote the belt and emphatically builtish lact of dispertions the prices forged ahead by great it remplote the belt and emphatically builtish lact of dispertions the prices forged ahead by great and an action of historial grain interests, whose purchases contril cited are the first forged ahead by great and an action of the mercial grain interests, whose purchases contril cited agreed to the strong ruling of the market, wait street, too, be ame a heavy buser, and the speculative public in general excilition of indicating particles of the mercial cities than in mostits. All sorts of rumors were circulated on the bilge, and shorts at times for indicating the lace and the prices forged ahead by great and an art true for the day of 1600 points of the grand particles of the day of 1600 points. Special particles of the day of 1600 points with the market fiscilly points. Specially, and a set of the day of 1600 points of the gran

New York, June 20.—Wool dull.

Recton, June 20.—The American Wool and Cotton Reporter will say ro-morrow: The last week has been a very duil and unsatisfactory one in the wool market. At no time this year, in fact,

Emory S. Foster,

Attest: Emory S. Foster. Secretary.

has the duliness been more intensified than it has been since our last raview. Reports from manufacturing centers are not of an altogether encouraging nature, and in some sections some mills are reported as running on reduced time. The consumers will purchase only very sparingly of wool, as they feel uncertain as to the opening of the light-weight season and the London sales, the two events that are anxiously awaited. In the meantime wools continue very firm in the Iertitories, and growers and buyers are apart. The sales of the week in Boston amounted to 1.164.09 list, domestic and 30,090 lbs. foreign, making a total of 1.484.000, against a total of 2.635.000 for the previous week and a total of 8.635.000 for the corresponding week last year. The sales since Jan 1 angunt to 68.731.00 lbs., against 118.64,200 lbs. for the corresponding time last year.

POULTRY. Receipts Free, Though Feeling Was Generally Weak. REPUBLIC SPECIAL.

New York, June 20.-Live poultry receipts today were 17 curs Western and 1 Southwestern. Receipts continue free, and while fowls were placed at Sige, the feeling was weak, and pros-pects for a clearance this week very slim. Spring

positity receipts to-day 15 pkgs. Advices for litter in the week are light and the market showed more strength, although there was no change in the price of any class of dressed goultry except fowls, which rose ic on all grades.

Butter, Cheese and Eggs.
